MATT SHADISH

San Francisco, CA · (925) 487-1921 · m.shadish@engineering.ucla.edu · GitHub: mshadish

EDUCATION

M.S. Analytics, University of San Francisco **Expected July 2015**
Coursework: Time Series Analysis, Machine Learning, Linear Regression, NoSQL Databases
GPA: 3.97

B.S. Mechanical Engineering, UCLA **December 2013**
Honors**:** Phi Beta Kappa, Tau Beta Pi
GPA: 3.75

Certifications: Base Programming for SAS 9

WORK EXPERIENCE

General Electric, San Ramon, CA **November 2014 – Present**
Data Analytics Intern
Parts Sourcing Project
- Improved search experience through parts database by integrating elasticsearch with a Python Flask app
- Deploying fuzzy matching of GE part descriptions as a MapReduce task with Hadoop Streaming

Company – Contact Mapping Project
- Doubled match rate of company names using Levenshtein distance metrics and custom weightings in Python

Engage3, Davis, CA **December 2013 – August 2014**
Data Scientist, Category Management Algorithms
- Managed, designed, and implemented Oracle PL/SQL algorithms to categorize 800M+ retail product records
- Improved runtime of daily Oracle PL/SQL batch processes by 90% by developing incremental features
- Modeled regular and promotional pricing among retailers using regression analysis of product prices
- Collaborated with other members of the Data Science team using TortoiseSVN, Git, and Assembla
- Began migration to Apache Cassandra with EIS team, leveraging my knowledge of pricing algorithms

Luminous Capital, Los Angeles, CA **April 2012 – June 2012**
Private Wealth Management Intern
- Managed client account database and ran quarterly performance reports for clients

PROJECTS

Kaggle: Driver Telematics Analysis **January 2015 – Present**
- Establishing driver fingerprints by extracting and creating features from driver positional data using R
- Differentiating unlabeled “true” records from noise using Random Forests with Python and scikit-learn

Kaggle: Sentiment Analysis on Movie Reviews **October 2014 – January 2015**
- Classified movie review sentiment using word vectorization and a support vector machine in Python

Financial Markets Sentiment Extraction **September 2014 – October 2014**
- Scraped market opinion sites to understand market sentiment using Python and Beautiful Soup

Eccentric Exercise Machine Prototype **June 2013 – September 2013**
Founder, Lead Engineer
- Researched, designed, and fabricated a prototype exercise machine made to facilitate eccentric exercise
- Drafted and submitted a provisional utility patent application

TECHNICAL SKILLS

- Programming Languages
  - Proficient: Python, SQL (Oracle PL/SQL, PostgreSQL, MySQL), R, SAS
  - Familiar: Bash, LaTeX, JavaScript, C++
- Other technologies: elasticsearch, Hadoop Streaming, MongoDB, Apache Solr
