

MATT SHADISH

2391 47th Avenue, San Francisco, CA 94116 · (925) 487-1921 · m.shadish@engineering.ucla.edu

EDUCATION

Master of Science, Analytics

Expected June 2015

UNIVERSITY OF SAN FRANCISCO, GPA 4.00

Bachelor of Science, Mechanical Engineering

December 2013

UNIVERSITY OF CALIFORNIA, LOS ANGELES, GPA 3.75

Honors: Phi Beta Kappa, Tau Beta Pi

WORK EXPERIENCE

Engage3, Davis, CA

December 2013 – August 2014

Data Scientist, Category Management Algorithms

- Managed, designed, and implemented Oracle PL/SQL algorithms for automating categorization of 800M+ retail price and product records
- Improved runtime of daily Oracle PL/SQL batch processes by 90% by developing incremental features
- Performed regression analysis of product prices to model how regular and promotional prices compare among retailers
- Collaborated with other members of the Data Science team using TortoiseSVN, Git, and Assembla
- Ran daily reports on user retention rates using PostgreSQL and weekly reports on data quality via Apache Solr queries
- Designed a Python script to relate similar retail products using image comparison to compensate for incomplete data
- Leveraged knowledge of pricing algorithms and worked with EIS team to begin migration to Apache Cassandra

ATAC, Sunnyvale, CA

June 2012 – June 2013

Aviation Data Analyst

- Participated in airport and airspace noise and emissions analysis studies using in-house software and Microsoft Excel
- Provided verbal and written feedback for data analysis procedures, streamlining the process

Luminous Capital, Los Angeles, CA

April 2012 – June 2012

Private Wealth Management Intern

- Compiled revenue and portfolio data, calculated annualized returns, ran quarterly performance reports for clients
 - Managed client account database, maintained data cohesion across multiple sources of client account data
-

RELEVANT TECHNICAL SKILLS

- Programming: Python, R, MATLAB, C++, VBA
 - Query languages: Oracle PL/SQL, PostgreSQL, MySQL
 - Project management/version control: Git, TortoiseSVN, Assembla
-

PROJECTS

Text Analysis for Financial Markets Insight

September 2014 – Present

Blog Scraping Lead

- Scraping websites offering opinion-based financial articles using Python to build a body of time-stamped documents
- Designing a Naïve-Bayes classifier in Python to extract general market sentiment from opinion-based articles
- Constructing a model using sentiment as a leading indicator of future market performance, testing for significant correlation

Eccentric Exercise Machine Prototype

June 2013 – September 2013

Founder, Lead Engineer

- Researched, designed, and fabricated a prototype exercise machine specifically made to facilitate eccentric exercise
- Design
 - Independently designed a method to provide specialized eccentric exercise via purely mechanical methods
 - Used Excel, 3D CAD software, and hand calculations for everything from preliminary calculations to optimization
 - Selected specific materials to ensure a factor of safety of at least 1.5 while maintaining cost effectiveness
 - Drafted and submitted a provisional utility patent application
- Fabrication
 - Calculated functional strengths of customizable parts from manufacturer Misumi when selecting/purchasing parts
 - Led a team of 4 in hand-fabricating the prototype, training team members in metal cutting, drilling & tapping holes
